YEARBOOK OF FISHERY STATISTICS

Until the end of 1963, the volumes on *Production and fishing craft* appeared annually and the volumes on *International trade* biennially.

Beginning with 1964 two volumes of the *Yearbook* are published annually. The volume subtitled *Catches and landings* covers data on quantities and values of fish caught and landed by countries, by species and by fishing areas. The volume subtitled *Fishery commodities* covers disposition of catches and both production and international trade data by types of fishery commodities.

ANNUAIRE STATISTIQUE DES PÊCHES

Jusqu'à la fin de 1963, les volumes *Production et bateaux de pêche* ont paru chaque année et les volumes *Commerce international* tous les deux ans.

A partir de 1964, l'*Annuaire* comprend deux volumes annuels. Le volume *Quantités pêchées et débarquées* renferme des données relatives au volume et à la valeur des prises et des apports par pays, par espèces et par lieux de pêche. Le volume *Produits des pêches* traite de la destination des apports et fournit des données sur la production et le commerce international par catégories de produits des pêches.

ANUARIO ESTADISTICO DE PESCA

Hasta finales de 1963, los volúmenes sobre *Producción y embarcaciones de pesca* aparecían anualmente y los volúmenes sobre *Comercio internacional* cada dos años.

A partir de 1964 se publicaron anualmente dos volúmenes del *Anuario*. El subtitulado *Capturas y desembarques* comprende cantidades y valores de la pesca capturada y desembarcada por países, especies y zonas. El volumen *Productos pesqueros* abarca las salidas de las capturas y datos de producción y comercio internacional por tipos de productos.

BULLETIN OF FISHERY STATISTICS

This *Bulletin* is issued from time to time in a limited number of copies to supplement the various volumes of the *Yearbook*.

It presents statistics of regional interest, data on selected topics (species groups, fishery commodities, fishing craft, fishermen, etc.) and other special tabulations for conferences, commissions, committees, working parties, etc.

Certain issues of the *Bulletin* will present conversion factors and texts concerning fishery statistical standard classifications, definitions, reporting and data-processing methods, etc.

BULLETIN STATISTIQUE DES PÊCHES

Le *Bulletin*, publié de temps à autre et tiré à un nombre limité d'exemplaires, a pour objet de compléter les différents volumes de l'*Annuaire*.

Il renferme des statistiques revêtant un intérêt régional, des données sur certaines questions (groupes d'espèces, produits des pêches, bateaux de pêche, pêcheurs, etc.), et des tableaux spéciaux destinés à des conférences, commissions, comités, groupes de travail, etc.

Certains numéros du *Bulletin* renfermeront des coefficients de conversion et des textes relatifs aux classifications statistiques standards, définitions, méthodes de transmission des statistiques et de traitement des données, etc., en matière de pêche.

BOLETIN ESTADISTICO DE PESCA

Cada cierto tiempo se publica una tirada reducida de este *Boletín* como suplemento de los varios volúmenes del *Anuario*.

Comprende estadísticas de interés regional, datos sobre determinadas materias (grupos de especies, prod[illegible]c-tos pesqueros, embarcaciones, p[illegible]a-dores, etc.) y otros cuadros es[illegible]es para conferencias, comisio[illegible]i-tés, grupos de trabajo, [illegible]

En algunos núme[illegible]a-rán coeficientes [illegible]k-tos relativos [illegible]a-dísticas uni[illegible]s pesquero[illegible]s y mét[illegible]s, etc.

BASIC DEFINITIONS USED IN THIS YEARBOOK

CATCH = The term "catch" unless otherwise specified refers to the "nominal catch", i.e., the live weight equivalent of the landings.

NOMINAL CATCH = The live weight equivalent of the landings.

LANDINGS = The weight of fish and fish products brought ashore, i.e., the actual weight of the quantities landed. This weight represents the net weight of the gutted, eviscerated, filleted, frozen, cured, canned fish and fish products at the time of landing. Exceptions are footnoted.

DEFINITIONS DE BASE EMPLOYEES DANS LE PRESENT ANNUAIRE

QUANTITES PECHEES = Sauf indication contraire, le terme "quantités pêchées" désigne la "pêche nominale", c'est-à-dire l'équivalent en poids vif des quantités débarquées.

PECHE NOMINALE = Equivalent en poids vif des quantités débarquées.

QUANTITES DEBARQUEES = Poids du poisson et des produits de la pêche mis à terre, c'est-à-dire poids effectif des quantités débarquées. Représente le poids net, au moment de la mise à terre, du poisson ou autres produits de la pêche vidés, éviscérés, découpés en filets, congelés, salés, fumés, séchés, en boîtes, etc. Les exceptions sont indiquées en bas de page.

DEFINICIONES DE LOS CONCEPTOS PRINCIPALES USADOS EN ESTE ANUARIO

CAPTURA = El término "captura", salvo indicación en contrario, se refiere a la "captura nominal", es decir al peso en vivo equivalente de la pesca desembarcada.

CAPTURA NOMINAL = Peso en vivo equivalente de la pesca desembarcada.

DESEMBARQUES = Peso del pescado y productos de la pesca llevados a tierra, es decir, el peso real de las cantidades desembarcadas. Este peso representa el peso neto del pescado y productos pesqueros destripados, eviscerados, fileteados, congelados, curados, enlatados, en el momento del desembarque. Las excepciones se señalan mediante notas al pie.

INTRODUCTION

The present issue of the *Yearbook of Fishery Statistics* brings up to date the annual statistics relating to production and international trade in fishery commodities previously published in Volume 21. Data for 1966 have been added in all tables. Whenever it has been possible to obtain improved breakdowns or revised data, new figures have been incorporated in the tables of this *Yearbook*.

The *Yearbook* tables are grouped and arranged in sections and subsections according to the framework established in Volume 21. Certain fishery products (i.e., fish cakes, pearl essence, mother-of-pearl, natural [wild or cultivated] pearls, seal skins, ambergris, sponges, fertilizers of aquatic animal or plant origin, bone meals, shell grit, shells), which do not belong to the seven commodity groups for which statistics are given in this Volume, have been excluded. Statistics for these products are somewhat incomplete; available data will be published in a *Bulletin of Fishery Statistics*.

A problem peculiar to the fishing industry arises from the statistical treatment of direct foreign landings in national offices; these should be treated as imports by the receiving country, and as exports by the country whose fleets make the deliveries. While it is comparatively easy for the receiving countries to obtain correct import statistics (i.e. including direct foreign landings), it is more difficult for the exporting countries to collect the data necessary for the inclusion of quantities landed abroad in their export statistics. Attempts to surmount this shortcoming have been made in this *Yearbook* by suitably adjusting export data, in particular those of fresh or frozen fish. For this reason there can be differences between the fresh or frozen fish export figures appearing in this *Yearbook* and those available in national publications.

The coverage of this Volume has been extended by adding to Section G (Oils and fats, crude or refined, of aquatic animal origin) a subsection G-4 providing data on imports by country of origin as reported by the principal importing countries. These new tabulations appear to be of use to the users of this *Yearbook* and therefore similar additions for other fishery commodity groups are planned in future issues.

In the stubs and column headings of tables the term "country" covers also territories, parts of countries, parts of territories, or combinations of these, such as economic or customs unions, etc. The designations of countries and territories and the arrangement of material in this publication should not be considered as implying any endorsement or other judgment by the Secretariat of the Food and Agriculture Organization of the United Nations regarding the legal status of any country or territory, or of its authorities, or in respect of the delimitation of its boundaries.

As in the past, governments and international organizations have made the timely publication of the *Yearbook* possible by the promptness with which they generally attended to requests and inquiries and the care they devoted to checking material submitted to them. Comments and suggestions for further improvement and refinement of the *Yearbook of Fishery Statistics* are welcomed and should be addressed to the Fishery Statistics and Economic Data Branch, Fishery Economics and Products Division, Department of Fisheries, FAO, Rome, Italy.

INTRODUCTION

La presente édition de l'*Annuaire statistique des pêches* constitue une mise à jour des statistiques annuelles relatives à la production et au commerce international des produits de la pêche précédemment publiées dans le volume 21. Les chiffres de 1966 ont été ajoutés à tous les tableaux. Chaque fois qu'il a été possible d'obtenir des ventilations ameliorées ou des données revisées, les nouveaux chiffres ont été inclus dans les tableaux du présent volume.

Les tableaux de l'*Annuaire* sont conçus, disposés et groupés en sections et sous-sections comme dans le volume 21. Certains produits de la pêche (p. ex. tourteaux de poisson, essence d'Orient, nacre, perles naturelles ou de culture, peaux de phoque, ambre gris, éponges, engrais provenant d'animaux ou de végétaux aquatiques, farine d'os, poudre de coquilles, coquillages), qui n'entrent pas dans les sept groupes de produits figurant dans le présent volume, ont été exclus. Les renseignements que l'on possède pour ces produits sont actuellement assez incomplets; des données seront publiées dans un numéro du *Bulletin statistique des pêches*.

Le traitement statistique, dans les offices nationaux, des quantités de poisson et produits des pêches débarquées directement à l'etranger pose un problème particulier à l'industrie des pêches; ces quantités devraient être considérées comme des importations par les pays où elles sont débarquées et comme des exportations par ceux dont les bateaux effectuent les livraisons. Il est relativement facile pour les premiers d'obtenir des statistiques correctes des importations (c'est-à-dire comprenant les quantités directement débarquées à l'étranger), mais il est plus difficile pour les seconds de réunir les données nécessaires à l'inclusion des quantités débarquées à l'étranger dans leurs statistiques d'exportation. On a essayé de remédier à cet inconvénient dans la présente édition de l'*Annuaire* en apportant des ajustements appropriés aux statistiques d'exportation, spécialement à celles qui ont trait au poisson frais ou congelé. C'est pourquoi il peut y avoir des différences entre les statistiques des exportations de poisson frais ou congelé figurant dans le présent *Annuaire* et celles qui apparaissent dans les publications nationales.

On a élargi le champ statistique du présent volume en ajoutant à la section G (Huiles et graisses, brutes ou raffinées, provenant d'animaux aquatiques) une sous-section G-4 fournissant des données sur les importations par pays d'origine, telles qu'elles ont été communiquées par les principaux pays importateurs. Ces nouveaux tableaux rendront sans doute service aux utilisateurs de l'*Annuaire*, et il est envisagé d'introduire dans les éditions futures des tableaux supplémentaires analogues pour d'autres groupes de produits de la pêche.

Le terme "pays" employé dans les colonnes des tableaux doit s'entendre également de territoires, parties de pays ou de territoires ou regroupements tels qu'unions économiques ou douanières, etc. Les désignations employées dans la présente publication et la présentation des matériaux qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies pour l'alimentation et l'agriculture aucune prise de position quant au statut juridique de tel ou tel pays ou territoire, ou de ses autorités, ni quant au tracé de ses frontières.

Comme par le passé, les gouvernements et les organisations internationales ont permis la publication en temps opportun de l'*Annuaire* grâce à la promptitude qu'ils ont généralement montrée pour répondre aux demandes et aux enquêtes et grâce au soin qu'ils ont apporté à la vérification des données recueillies. Les commentaires et suggestions pour l'amélioration de l'*Annuaire statistique des pêches*, qui seront les bienvenus, doivent être adressés à la Sous-Division des statistiques halieutiques et des données économiques, Division de l'économie et des produits de la pêche, Département des pêches, FAO, Rome (Italie).

PERIODE DE REFERENCE

Les années civiles sont indiquées de la façon normale: 1938, 1948, 1958, 1963, etc.

Les années fractionnées — périodes de 12 mois commençant dans le courant d'une année et se terminant dans l'année suivante — sont indiquées par un *trait oblique*, comme suit: 1960/61, 1962/63, etc.

Les périodes de plusieurs années consécutives, y compris les deux années spécifiées et les moyennes annuelles pour une série d'années civiles consécutives, sont indiquées par un *tiret*, comme suit: 1948-52, 1953-57, 1958-62, etc.

PREAMBULO

El presente volumen del *Anuario Estadístico de Pesca* pone al día las estadísticas anuales sobre la producción y el comercio internacional de productos pesqueros, previamente publicadas en el volumen 21. En todos los cuadros se han agregado los datos correspondientes a 1966. Siempre que ha sido posible obtener una mejor descomposición de los datos o disponer de datos revisados se han incluído las nuevas cifras en los cuadros de este.

En el presente *Anuario* se han mantenido la estructura tabular y la disposición y agrupación de los cuadros en secciones y subsecciones, adoptadas para el volumen 21. Se excluyen determinados productos pesqueros (es decir, tortas de pescado, esencia de Oriente, madre-perla, perlas naturales [silvestres o cultivadas], pieles de foca, ámbargris, esponjas, fertilizantes de origen vegetal o de animales acuáticos, harina de huesos, polvo de conchas, conchas) que no están comprendidos en los siete grupos de productos de que se ocupa este *Anuario*. Los datos existentes para éstos son algó incompletos; tales datos se publicarán en un *Boletín estadístico de pesca*.

Un problema peculiar de la industria pesquera deriva de la forma de tratar estadísticamente los datos referentes a los desembarques directos de productos pesqueros en el extranjero o del extranjero en las oficinas nacionales; éstos deben considerarse como importaciones por el país que los recibe, y como exportaciones por el país cuyas embarcaciones efectúan la entrega. Aunque a los países receptores les es relativamente fácil obtener estadísticas de importación exactas (es decir, que incluyan los desembarques directos procedentes del extranjero), a los países exportadores les resulta más difícil reunir los datos necesarios para la inclusión en sus estadísticas de exportación de las cantidades desembarcadas en el extranjero. En este *Anuario* se ha tratado de superar tal dificultad reajustando convenientemente los datos de las exportaciones, en especial los relativos al pescado fresco o congelado. Por este motivo pueden existir diferencias entre las cifras correspondientes a la exportación de pescado fresco o congelado que aparecen en este *Anuario* y las que figuran en las publicaciones nacionales.

Se ha ampliado el alcance estadístico del presente volumen añadiendo a la Sección G (Aceites y grasas, en bruto o refinados, procedentes de animales acuáticos) una subsección G-4 con los datos sobre importaciones por países de origen, facilitados por los principales importadores. Como parece ser que estas nuevas tabulaciones son útiles a los usuarios de este *Anuario*, se proyectan adiciones análogas para otros grupos de productos pesqueros en las ediciones futuras del *Anuario*.

En los encabezamientos de conceptos y columnas de los cuadros, el término "país" comprende también los territorios, partes de países, partes de territorios, o combinaciones de éstos, tales como uniones económicas o aduaneras, etc. Las denominaciones de países y territorios empleadas en esta publicación y la disposición de los datos que contiene, no suponen, por parte de la Secretaría de la Organización de las Naciones Unidas para la Agricultura y la Alimentación, aceptación ni juicio alguno sobre la condición jurídica de ninguno de los países o territorios citados o de sus autoridades, ni respecto a la delimitación de sus fronteras.

Como hasta ahora, los gobiernos y las organizaciones internacionales han hecho posible la publicación en tiempo oportuno de este *Anuario* debido a la rapidez con que, en general, atendieron a las peticiones y consultas y al cuidado que pusieron en la comprobación de los materiales que se enviaron. Se agradecerán las observaciones y sugerencias que se hagan para mejorar y perfeccionar aún más el *Anuario Estadístico de Pesca*, debiendo dirigirlas a la Subdirección de Estadística y Datos Económicos Pesqueros, Dirección de Economía y Productos Pesqueros, Departamento de Pesca, FAO, Roma, Italia.

b/ 1958, excludes data for crustaceans, molluscs and turtles.
c/ Includes small quantities of "Freezing".
d/ Totals exclude "Aquatic plants".
e/ Excludes seaweeds.
f/ Excludes freshwater fish.
g/ "Marketing fresh" includes "Freezing".
h/ Excludes aquiculture fisheries.

FISH, FRESH, CHILLED OR FROZEN

This commodity group (No. 11) refers to fresh, chilled or frozen fish and fish products used for human consumption, for industrial purposes (e.g. canning, etc.), for spawning or for aquaria. It also includes fish lightly salted or kept alive for transport purposes.

This commodity group (No. 11) consists of the following six subgroups:

111 - FISH FILLETS, FRESH OR CHILLED - fresh or chilled fillets made from all species, except herring *(Clupea harengus)*, belonging to Species Groups 11-15 and 21-29.

112 - HERRING, FRESH OR CHILLED - fresh or chilled products, including fillets, made from herring *(Clupea harengus)*, one of the species belonging to Species Group 25.

113 - MISCELLANEOUS FISH PRODUCTS, FRESH OR CHILLED - fresh or chilled, whole or eviscerated fish and other products, except fillets, made from all species other than herring *(Clupea harengus)*, belonging to Species Groups 11-15 and 21-29. It also includes fish lightly salted or kept alive for transport purposes.

114 - FISH FILLETS, FROZEN - frozen fillets made from all species, except herring *(Clupea harengus)*, belonging to Species Groups 11-15 and 21-29.

The four production tables in Subsection B-1 cover commodity Subgroups 111, 114, 115 and 116; production tables for Subgroups 112 and 113 have been omitted as these cannot be considered to refer to preserved and processed commodities. The import-export table in Subsection B-2 covers the entire Commodity Group No.11; the six export tables in Subsection B-3 cover the above six commodity subgroups.

For the two statistical classifications, by groups and subgroups, of fishery commodities and of species, see Sections 6 and 7 of the NOTES.

Ce groupe de produits (No 11) comprend les six sous-groupes suivants:

111 - FILETS DE POISSON, FRAIS OU REFRIGERES - filets frais ou réfrigérés préparés à partir de toutes les espèces, excepté le hareng *(Clupea harengus)*, appartenant aux groupes d'espèces 11-15 et 21-29.

112 - HARENG, FRAIS OU REFRIGERE - produits frais ou réfrigérés, y compris les filets, préparés à partir de hareng *(Clupea harengus)*, une des espèces appartenant au groupe d'espèces 25.

114 - FILETS DE POISSON CONGELES - filets congelés préparés à partir de toutes les espèces, excepté le hareng *(Clupea harengus)*, appartenant aux groupes d'espèces 11-15 et 21-29.

115 - HARENG CONGELE - produits congelés, y compris les filets, préparés à partir de hareng *(Clupea harengus)*, une des espèces appartenant au groupe d'espèces 25.

116 - PRODUITS DIVERS DE POISSON CONGELES - poissons congelés entiers, poissons éviscérés congelés et autres produits congelés, à l'exception des filets, préparés à partir de toutes les espèces autres que le hareng *(Clupea harengus)*, appartenant aux groupes d'espèces 11-15 et 21-29.

Les quatre tableaux de la sous-section B-1 relatifs à la production couvrent les sous-groupes de produits 111, 114, 115 et 116, aucun tableau n'étant fourni pour les sous-groupes 112 et 113, dont le contenu ne peut être considéré comme consistant des produits conservés ou traités. Le tableau de la sous-section B-2 relatif aux importations et exportations porte sur la totalité du groupe de produits No 11. Les six tableaux de la sous-section B-3 consacrés aux exportations couvrent les six sous-groupes de produits énuméres plus haut.

CRUSTACEANS AND MOLLUSCS, FRESH, FROZEN, DRIED, SALTED, ETC.

This commodity group (No. 13) refers to live, fresh, frozen, dried and salted, crustacean and mollusc products, including crustaceans in the shell, simply boiled in water. Cooked crustaceans and cooked molluscs are excluded; they are included in Commodity Group 22.

This commodity group (No. 13) consists of the following two subgroups:

131 - CRUSTACEANS, FRESH, FROZEN, DRIED, SALTED, ETC. - fresh (peeled and unpeeled) crustaceans and frozen, dried-unsalted, dried-salted, wet-salted, brine-packed and other dried-or salt-cured products made from all species belonging to Species Groups 31 and 33. Crustaceans in the shell, simply boiled in water, are also included.

132 - MOLLUSCS, FRESH, FROZEN, DRIED, SALTED, ETC. - fresh (shucked and unshucked) molluscs and frozen, dried-unsalted, dried-salted, wet-salted, brine-packed and other dried or salt-cured products, made from all species belonging to Species Group 32.

The coverage of the production and international trade data shown in this Section conforms with the above definition, except that the production tables (D1-1 and D1-2) do not cover fresh unpeeled crustaceans and fresh unshucked molluscs which cannot be considered to be preserved or processed commodities.

For the two statistical classifications, by groups and subgroups, of fishery commodities and of species, see Sections 6 and 7 of the NOTES.

CRUSTACES ET MOLLUSQUES FRAIS, CONGELES, SECHES, SALES, ETC.

Ce groupe de produits (No 13) comprend les crustacés et les mollusques vivants, frais, congelés, séchés et salés, y compris les crustacés non décortiqués, simplement cuits à l'eau. Les crustacés et les mollusques cuits ne sont pas compris dans ce groupe de produits; ils sont compris dans le groupe 22.

Ce groupe de produits (No 13) comprend les deux sous-groupes suivants:

131 - CRUSTACES FRAIS, CONGELES, SECHES, SALES, ETC. - crustacés frais (décortiqués ou non) et produits congelés, séchés non salés, séchés salés, salés verts, emballés en saumure et autres produits séchés ou salés préparés à partir de toutes les espèces appartenant aux groupes d'espèces 31 et 33. Les crustacés non décortiqués, simplement cuits à l'eau, sont aussi compris dans ce groupe.

132 - MOLLUSQUES FRAIS, CONGELES, SECHES, SALES, ETC. - mollusques frais (décoquillés ou non) et produits congelés, séchés non salés, séchés salés, salés verts, emballés en saumure et autres produits salés ou séchés préparés à partir de toutes les espèces appartenant au groupe d'espèces 32.

Le traitement des données de la présente section relatives à la production et au commerce international est conforme aux définitions ci-dessus, à une exception près: dans les tableaux "Production" (tableaux D1-1 et D1-2) ne sont pas compris les crustacés frais non décortiqués ni les mollusques frais non décoquillés, qui ne peuvent être considérés comme produits conservés ou traités.

Pour les deux classifications statistiques, par groupe et sous-groupes, des produits de la pêche et des espèces, voir sections 6 et 7 des NOTES.

212 - HERRINGS, SARDINES, ANCHOVIES, ETC., IN AIRTIGHT CONTAINERS - products and preparations made from all species belonging to Species Group 25.

213 - TUNAS, BONITOS, SKIPJACKS, IN AIRTIGHT CONTAINERS - products and preparations made from all species belonging to Species Group 26.

214 - MISCELLANEOUS FISH PRODUCTS, IN AIRTIGHT CONTAINERS - products and preparations made from all species belonging to Species Groups 11-13, 14 (excluding Pacific Salmons), 15, 21-24, 27-29.

Ce groupe de produits (No 21) comprend les cinq sous-groupes suivants:

211 - SAUMONS DU PACIFIQUE EN RECIPIENTS HERMETIQUES - produits et préparations préparés à partir des saumons du Pacifique (*Oncorhynchus* spp.), c'est-à-dire certaines espèces appartenant au groupe d'espèces 14.

CRUSTACEAN AND MOLLUSC PRODUCTS AND PREPARATIONS, WHETHER OR NOT IN AIRTIGHT CONTAINERS

This commodity group (No. 22) refers to canned products, i.e. products and preparations in airtight containers mostly tins, cans or bottles, usually heat sterilized. It includes also all cooked crustaceans and molluscs as well as marinated, fermented and similarly elaborately prepared products made from crustaceans, molluscs and other invertebrates, i.e. sea-cucumbers, sea-urchins, etc.

This commodity group (No. 22) consists of the following four subgroups:

221 - CRUSTACEAN PRODUCTS, IN AIRTIGHT CONTAINERS - products and preparations made from all species belonging to Species Groups 31 and 33.

222 - MOLLUSC PRODUCTS, IN AIRTIGHT CONTAINERS - products and preparations made from all species belonging to Species Group 32.

223 - CRUSTACEAN PREPARATIONS, NOT IN AIRTIGHT CONTAINERS - marinated, fermented and similarly elaborately prepared products made from all species belonging to Species Groups 31 and 33.

224 - MOLLUSC PREPARATIONS, NOT IN AIRTIGHT CONTAINERS - marinated, fermented and similarly elaborately prepared products made from all species belonging to Species Group 32.

For the two statistical classifications, by groups and subgroups, of fishery commodities and of species, see Sections 6 and 7 of the NOTES.

Ce groupe de produits (No 22) comprend les quatre sous-groupes suivants:

221 - PRODUITS DE CRUSTACES EN RECIPIENTS HERMETIQUES - produits et préparations préparés à partir de toutes les espèces appartenant aux groupes d'espèces 31 et 33.

222 - PRODUITS DE MOLLUSQUES EN RECIPIENTS HERMETIQUES - produits et préparations préparés à partir de toutes les espèces appartenant aux groupes d'espèces 32.

NOTES

1. STATISTICS ON DISPOSITION OF NOMINAL CATCHES

1.1 STATISTICAL COVERAGE

1.1.1 Inclusions

The statistics cover the disposition of quantities of the annual nominal catches or landings of all aquatic animals and plants (except whales) made by both commercial and subsistence fishermen operating in freshwater, brackishwater and marine areas. The disposition of quantities produced through fish-farming and shellfish-culture is also included.

Disposition statistics for aquatic animals and plants include species belonging to the following six Divisions of the International Standard Statistical Classification of Aquatic Animals and Plants (ISSCAAP):

1. Freshwater and diadromous fishes
2. Marine fishes
3. Crustaceans, molluscs and other invertebrates
...
5. Seals and miscellaneous aquatic mammals
6. Miscellaneous aquatic animals and residues
7. Aquatic plants

For further details see the ISSCAAP: Divisions and Groups, shown in Section 7.

Statistics also include the disposition of quantities (nominal catches) processed on board fish factoryships and other fishing craft belonging to the reporting country.

It should be noted that in this Yearbook the term "catch" unless otherwise specified refers to the "nominal catch", i.e. the live weight equivalent of the landings.

1.1.2 Exclusions

The statistics exclude the disposition of:

(a) Catches and landings of large and small-growing whales (species belonging to groups 4.1 and 4.2, i.e. Division 4 of the International Standard Statistical Classification of Aquatic Animals and Plants).

(b) Catches made by sport fishermen.

(c) Discarded catch, i.e. whole fish returned to the sea at the time of capture.

(d) Imports of aquatic animals and plants.

1.1.3 Statistical treatment of direct foreign landings

The statistics include the disposition of catches landed in foreign ports by the craft of the reporting country. If it is not known how these catches are utilized, they are included under the "Marketing fresh" disposition channel.

1.2 CLASSIFICATION AND DEFINITIONS

1.2.1 For purposes of standardization and of international comparisons statistics on disposition of catch are based on the following seven main categories ("disposition channels"):

Disposition channel	Type of commodity produced
(a) For marketing fresh	Fresh products: live, fresh, chilled or iced, round or dressed, fish fillets, cutlets, etc.
(b) For freezing	Frozen products: frozen, round or dressed fish, cutlets, fillets, etc.
(c) For curing	Cured products: dried, salted (wet-salted, brine-packed, etc.), smoked, spiced, seasoned, marinated, vinegar- or sugar-cured, fermented products (sauces, juices, pastes), etc.
(d) For canning	Canned products: packed in airtight containers.
(e) For reduction	(I) Oils: edible and inedible body oils, liver oils containing vitamins, etc. (II) Meals and fertilizers: including various kinds of meals and solubles (see 1.2.2 below).

(continued)

1.2.1 (concluded)

Disposition channel		Type of commodity produced
(f)	For miscellaneous purposes	Miscellaneous products: fresh, frozen and processed products, other than meals, used as feed for animals, birds and fishes. Bait, pearl essence, glues, etc.
(g)	Offal for reduction	(See section 1.2.2 below).

1.2.2 Only whole fish destined for the manufacture of oils and meals is included in the "Reduction" channel; raw material for reduction derived from fish primarily destined for marketing fresh, freezing, curing, canning, and miscellaneous purposes is classified separately as "offal for reduction". The figures in this latter disposition category are on a net weight basis (i.e., the actual weight of the "waste" available for reduction) and are shown in parentheses in the tables as such quantities are also included in the live weight of the fish from which they are derived.

1.2.3 Catches are classified by disposition channel according to the ultimate end-product produced; e.g., quantities of fish which are in the first instance frozen for delivery as raw materials to canneries for the manufacture of canned products, are to be included under the canning disposition channel, while fish sold in the frozen form to the consumer is shown under the freezing disposition channel.

2. STATISTICS ON PRODUCTION OF PRESERVED AND PROCESSED FISHERY COMMODITIES

2.1 STATISTICAL COVERAGE

2.1.1 Inclusions

The statistics cover the annual quantities of preserved and processed fishery commodities produced not only from the nominal catches of all aquatic animals and plants (except whales) made by both commercial and subsistence fishermen operating in freshwater, brackishwater and marine areas and from the output of fish-farming and shellfish-culture activities, but also from imported raw materials.

Statistics therefore cover the production of preserved and processed commodities prepared from species belonging to all seven Divisions of the International Standard Statistical Classification of Aquatic Animals and Plants (ISSCAAP):

1. Freshwater and diadromous fishes
2. Marine fishes
3. Crustaceans, molluscs and other invertebrates
4. Whales
5. Seals and miscellaneous aquatic mammals
6. Miscellaneous aquatic animals and residues
7. Aquatic plants

For further details see ISSCAAP: Divisions and Groups, shown in Section 7.

The statistics include the output of processed commodities produced on board fish factory ships and other fishing craft belonging to the reporting country.

The statistics also include the commodities produced by fisherman families as domestic activities, for example the drying, salting and smoking of fish, crustaceans, molluscs, etc.

2.1.2 Statistical treatment of direct foreign landings of fishery products

The statistics on preserved and processed fishery commodities include also the products produced on board domestic fish factoryships and fishing craft from the reporting country even when landed directly in foreign ports. However, the domestic production does not include direct deliveries of preserved and processed fishery commodities made by foreign fish factoryships or fishing craft discharging their production in domestic ports.

2.2 CLASSIFICATION AND DEFINITIONS

2.2.1 For purposes of standardization and of international comparisons statistics on the production of preserved and processed commodities are based on the International Standard Statistical Classification of Fishery Commodities (ISSCFC) shown in Sections 6.1 and 6.2.

3. STATISTICS ON THE INTERNATIONAL TRADE IN FISHERY COMMODITIES

3.1 STATISTICAL COVERAGE

3.1.1 Inclusions

The statistics cover the quantities and values of annual imports and exports of the commodities included under the following headings:

Commodity group	ISSCFC a/	SITC (rev.) b/	BTN c/
(a) Fish, fresh, chilled or frozen	11	031.1	03.01
(b) Fish, dried, salted or smoked	12	031.2	03.02

(g) Meals, solubles and similar animal feedingstuffs of aquatic animal origin	41	part of 081.4	part of 23.01

a/ ISSCFC: "International Standard Statistical Classification of Fishery Commodities".
b/ SITC (rev.): "Standard International Trade Classification, Revised".
c/ BTN: "Brussels Tariff Nomenclature".

3.1.2 Exclusions

Import statistics exclude fish and fishery products caught by domestic fishing craft and landed in domestic ports.

3.1.3 Statistical treatment of direct foreign landings of fishery products

The internationally recommended practice is as follows:

(a) Import statistics should include fish and fishery products caught by foreign fishing craft and landed in domestic ports.

(b) Export statistics should include fish and fishery products caught by domestic fishing craft and landed in foreign ports.

Footnotes indicate the extent to which the statistical procedures in each country comply with these international standard practices. See also notes on countries shown as footnotes to the tables in Sub-section A4.

3.2 DEFINITIONS

3.2.1 Merchandise (fishery commodities)

For purposes of standardization and of international comparisons, statistics on the imports and exports of fish and fishery products are based on the International Standard Statistical Classification of Fishery Commodities (ISSCFC) shown in Section 6. The seven fishery commodity groups listed above under 3.1.1 have been defined in terms of the Standard International Trade Classification (Revised), the Brussels Tariff Nomenclature and the ISSCFC. See Section 6.

3.2.2 Definition of customs area

The statistics as reported here refer to the customs area of the country for the years shown; generally, this coincides with its geographical area. Exceptions are indicated in the notes on countries shown as footnotes to the tables in Sub-section A4.

3.2.3 Definitions of countries of origin and destination

Footnotes indicate if the trade in fishery commodities with any particular country or countries is excluded from the import and export statistics provided by the reporting country.

3.2.4 Definition of systems of recording international trade

Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded: (a) special trade, (b) general trade. See notes on countries shown as footnotes to the tables in Sub-section A4.

4. UNITS OF MEASUREMENT AND TOTALS

4.1 TIME

4.1.1 The annual data (with the exception of the whaling data) in the tables in this Yearbook are shown on a calendar year basis; the few exceptions (usually minor entries) are indicated by footnotes.

4.1.2 Where data for split years are tabulated together with data on a calendar year basis, those for split years ending on 29 June or earlier are shown with the calendar year in which the split years begin, while data for split years ending 30 June or later are shown with the calendar year in which the split years end.

4.1.3 In all tables those figures relating to the production of commodities derived from whales are given for the "whaling year" (a split year) which covers (i) the Southern Hemisphere summer whaling season beginning towards the end of one calendar year and ending early in the subsequant year, and (ii) the Northern Hemisphere summer whaling season of that second year. Where the data for the "whaling year" are tabulated together with data on a calendar year basis the former are shown under the calendar year in which such a "whaling year" ends.

4.1.4 The months of the calendar year are, in some instances, indicated by Roman numerals.

4.2 QUANTITIES

4.2.1 The metric weight system is used wherever possible. The principal factors used in converting other units to metric weight equivalents are shown in the appended conversion factors. Where no conversion factors are available, or where it appears technically inappropriate to show quantities in weight units, the data are expressed in the units used in the original source.

4.2.2 Data expressed in units other than those specified in the table headings are shown in quotes.

4.2.3 The quantity figures in this publication are in terms of the net or gross weight as shown in the national statistics of the individual countries. Most countries report net weights and some have changed their system from gross to net during the period covered by this Yearbook.

The "nominal catch" is expressed on a live-weight basis and the "landings" on a landed-weight basis.

4.3 VALUES

4.3.1 Values are generally shown in the appropriate national currency - rounded where necessary.

4.3.2 Where values have been converted to United States dollars, this has been done on the basis of the annual conversion factors shown in the appended CONVERSION FACTORS.

4.3.3 The notes on countries shown as footnotes to the tables in Sub-section A4 should be consulted to determine whether the c.i.f. or f.o.b. valuation is used.

4.4 TOTALS AND AGGREGATES

4.4.1 In the computation of grand totals the data shown have been supplemented by FAO estimates where (...) indicates that no official figures are available. No allowance has been made for countries and items omitted altogether from the tables. Square brackets [ ] around aggregates indicate those for which more than 10 percent were estimated by FAO in the absence of official figures.

4.4.2 Quantities are expressed to the nearest hundred metric tons (thousand metric tons rounded to one decimal place). The aggregates for commodity groups and commodity sub groups and continental totals are rounded to the nearest thousand metric tons. Grand totals for the world as a whole to the nearest ten thousand metric tons.

5. COUNTRIES AND THEIR ARRANGEMENT BY CONTINENT

5.1 NOMENCLATURE

5.1.1 In selecting country names (sometimes in abbreviated form for convenience) attention has been paid to usages in publications currently issued by international agencies as well as to official preferences as apparent to FAO in the light of de facto situation at the time the manuscript of this volume was completed (see note at top of verso of title page).

5.1.2 In the stubs and column headings of tables the term "country" covers also territories, parts of countries, parts of territories, or combinations of these, such as customs unions, etc. The designations of countries and territories and the arrangement of material in this publication should not be considered as implying any endorsement or other judgement by the Secretariat of the Food and Agriculture Organization of the United Nations regarding the legal status of any country, territory, or of its authorities, or in respect of the delimitation of its boundaries.

5.2 ARRANGEMENT

5.2.1 Countries and territories, regardless of constitutional status and degree of sovereignty, are listed in the English alphabetical order within the seven continental divisions of the world. In the tables in Sub-Sections B3, C3, D3, E3, F3, G3, H3, the English alphabetical order, irrespective of continental location, is used for the arrangement of countries of destination; the designations of "countries of destination" are those appearing in the national publications used as sources.

5.2.2 The English alphabetical order is followed in arranging the continents:

1. Africa
2. America, North
3. America, South
4. Asia
5. Europe
6. Oceania
7. U.S.S.R.

5.3 NOTES ON COUNTRIES

5.3.1 When relating statistics on fishing, processing and preserving to the international trade data of a country, differences in territorial concepts should be kept in mind.

5.3.2 Notes on a country basis concerning the coverage of the national data, the statistical treatment of direct foreign landings, weight basis, and other aspects of general concern, appear as footnotes to the tables in Sub-section A4 and other tables.

NOTES

1. STATISTIQUES SUR L'UTILISATION DES QUANTITES PECHEES

1.1 PORTEE DES STATISTIQUES

1.1.1 Données comprises

Les statistiques portent sur l'utilisation de la totalité des pêches nominales ou des quantités débarquées annuellement de tous les animaux et plantes aquatiques (à l'exception des baleines) provenant de la pêche tant commerciale que de subsistance (mer, eau saumâtre ou eau douce). Elles portent aussi sur l'utilisation des quantités produites grâce à la pisciculture et à la conchyliculture.

Les statistiques relatives à l'utilisation des animaux et plantes aquatiques portent sur les espèces appartenant aux six divisions suivantes de la Classification statistique internationale type des animaux et plantes aquatiques (CSITAPA):

1. Poissons d'eau douce et poissons diadromes
2. Poissons marins
3. Crustacés, mollusques et autres invertébrés
   ...
5. Phoques et mammifères aquatiques divers
6. Animaux aquatiques divers et résidus
7. Plantes aquatiques

Pour plus de détails, voir la CSITAPA: Divisions et groupes, qui figure à la Section 7.

Les statistiques portent également sur l'utilisation des quantités traitées à bord des navires-usines et autres bateaux de pêche du pays déclarant.

Prière de noter que, sauf indication contraire, dans le présent Annuaire le terme "quantités pêchées" désigne la "pêche nominale", c'est-à-dire l'équivalent en poids vif des quantités débarquées.

1.1.2 Données non comprises

Les statistiques sur l'utilisation ne comprennent pas:

(a) Les quantités pêchées et débarquées de baleines de grande ou petite taille (espèces appartenant aux groupes 41 et 42 de la Division 4 de la Classification statistique internationale type des animaux et plantes aquatiques).

(b) Les quantités provenant de la pêche sportive.

(c) Les quantités rejetées, c'est-à-dire les poissons entiers rendus à la mer au moment de leur capture.

(d) Les importations d'animaux et de plantes aquatiques.

1.1.3 Traitement statistique des quantités débarquées directement à l'étranger ou de l'étranger

Les statistiques portent sur l'utilisation des quantités pêchées par les bateaux du pays interessé et débarquées dans des ports étrangers. Si l'on ignore comment ces quantités sont utilisées, elles sont inclues dans la catégorie d'utilisation dénommée "Marée fraîche".

1.2 CLASSEMENT ET DEFINITIONS

1.2.1 Pour normaliser les statistiques et permettre les comparaisons internationales sur l'utilisation des quantités pêchées, les données sont réparties entre les sept grandes catégories suivantes ("modes d'utilisation"):

Mode d'utilisation		Type de produit
(a)	Marée fraîche	Produits frais: poisson vivant, frais, rafraîchi ou emballé dans la glace, entier ou apprêté, escalopes, filets, etc.
(b)	Congélation	Produits congelés: poisson congelé, entier ou apprêté, escalope, filets, etc.
(c)	Séchage, fumage, salaison	Produits séchés, fumés, salés: poisson séché, salé (salé vert, emballé en saumure, etc.) fumé, épicé, assaisonné, mariné, conservé au vinaigre ou au sucre, produits fermentés (sauce, jus, pâtes), etc.

(A suivre)

1.2.1 (fin)

Mode d'utilisation		Type de produit
(d)	Conserve	Produits en conserves: en récipients fermés hermétiquement.
(e)	Traitement industriel	(I) Huiles: huiles de chair, comestibles et non comestibles, huiles de foie contenant des vitamines, etc. (II) Farines et engrais: différents types de farines et de solubilisés (voir ci-dessous 1.2.2).
(f)	Utilisations diverses	Produits divers: produits frais, congelés et traités, autres que les farines, utilisés pour l'alimentation des animaux, des oiseaux et des poissons. Appâts, essences de perles, colles, etc.
(g)	Déchets pour transformation	(voir ci-dessous 1.2.2).

1.2.2 Dans la catégorie "Traitement industriel" ne figure que du poisson entier destiné à la fabrication d'huiles et de farines; la matière première destinée au traitement industriel et provenant de poissons essentiellement destinés à d'autres usages (marée fraîche, congélation, séchage, fumage, salaison, conserve, etc.) est classée à part comme "Déchets pour transformation". Les chiffres se rapportant à cette dernière catégorie représentent le poids net (poids réel des déchets disponibles pour la transformation) et figurent entre parenthèses, ces déchets étant également compris dans les poids vif du poisson dont ils proviennent.

1.2.3 Les quantités pêchées sont classées par catégorie d'utilisation, selon le dernier produit fabriqué; par exemple, les quantités de poisson qui sont tout d'abord congelées pour être livrées en tant que matière première aux conserveries pour la fabrication de conserves doivent figurer à la rubrique conserves, tandis que le poisson vendu sous forme congelée aux consommateurs est classé à la rubrique congélation.

2. STATISTIQUES SUR LES PRODUITS DE LA PECHE CONSERVES ET TRAITES

2.1 PORTEE DES STATISTIQUES

2.1.1 Données comprises

Les statistiques indiquent les quantités des produits de la pêche conservés et traités annuellement, préparés non seulement à partir de toutes les pêches nominales de tous les animaux et plantes aquatiques (à l'exception des baleines) provenant de la pêche commerciale et de subsistance (mer, eau saumâtre ou eau douce) ainsi que de la pisciculture et de la conchyliculture, mais aussi préparés à partir de matières premières importées.

Les statistiques portent donc sur la production de produits de la pêche conservés et traités, préparés à partir d'espèces appartenant aux sept divisions suivantes de la Classification statistique internationale type des animaux et plantes aquatiques (CSITAPA):

1. Poissons d'eau douce et poissons diadromes
2. Poissons marins
3. Crustacés, mollusques et autres invertébrés
4. Baleines
5. Phoques et mammifères aquatiques divers
6. Animaux aquatiques divers et résidus
7. Plantes aquatiques

Pour plus de détails, voir la CSITAPA: Divisions et Groupes, qui figure à la Section 7.

Les statistiques comprennent les quantités de produits traités à bord des navires-usines et autres bateaux de pêche appartenant au pays déclarant.

Elles comprennent également les produits transformés par les familles de pêcheurs à titre d'activités domestiques (par exemple, séchage, salaison et fumage de poissons, crustacés, mollusques, etc.).

2.1.2 Traitement statistique des cas où les produits de la pêche sont débarqués à l'étranger

Les statistiques sur les produits de la pêche conservés et traités comprennent aussi les produits fabriqués à bord des navires-usines et bateaux de pêche du pays déclarant, même si ces produits sont débarqués directement dans des ports étrangers. Par contre, la production intérieure ne comprend pas les livraisons directes de produits de la pêche conservés et traités effectuées par des navires-usines ou des bateaux de pêche étrangers qui débarquent leur production dans les ports du pays déclarant.

2.2 CLASSEMENT ET DEFINITIONS

2.2.1 Afin de normaliser les statistiques et de permettre les comparaisons internationales sur la production des produits conservés et traités, les statistiques se fondent sur la Classification statistique internationale type des produits de la pêche (CSITPP) qui figure à la Section 6.1 et 6.2.

3. STATISTIQUES DES IMPORTATIONS ET DES EXPORTATIONS DES PRODUITS DE LA PECHE

3.1 PORTEE DES STATISTIQUES

3.1.1 Données comprises

Les statistiques portent sur les quantités et valeurs des importations et exportations annuelles des produits compris dans les groupes suivants:

Groupe de produit	CSITPP a/	CTCI (rev.) b/	NDB c/
(a) Poissons frais, réfrigérés ou congelés	11	031.1	03.01
(b) Poissons séchés, salés ou fumes	12	031.2	03.02
(c) Crustacés et mollusques frais, congelés, séchés, salés, etc.	13	031.3	03.03
(d) Produits de poissons et préparations, en récipients hermétiques ou non	21	032.0(1)	16.04
(e) Produits de crustacés et mollusques et préparations, en récipients hermétiques ou non	22	032.0(2)	16.05
(f) Huiles et graisses, brutes ou raffinées, provenant d'animaux aquatiques	31	411.1	15.04
(g) Farines, solubilisés et aliments similaires pour animaux, provenant d'animaux aquatiques	41	partie de 081.4	partie de 23.01

a/ CSITPP: "Classification statistique internationale type des produits de la pêche".
b/ CTCI: "Classification-type pour le commerce international, revisée".
c/ NDB: "Nomenclature douanière de Bruxelles".

3.1.2 Données non comprises

Les statistiques d'importation ne comprennent pas les poissons et produits des pêches capturés par des bateaux de pêche nationaux et débarqués dans les ports nationaux.

3.1.3 Traitement statistique des quantités de poissons et produits des pêches débarquées directement à l'étranger

La méthode recommandée sur le plan international est la suivante:

(a) Les statistiques d'importations doivent comprendre les poissons et produits des pêches capturés par des bateaux de pêche étrangers et débarqués dans les ports nationaux.

(b) Les statistiques d'exportations doivent comprendre les poissons et produits des pêches capturés par des bateaux de pêche nationaux et débarqués dans les ports étrangers.

Les notes figurant dans les tableaux indiquent dans quelle mesure les méthodes statistiques en vigueur dans chaque pays sont conformes à ces méthodes internationales types. Voir également les notes sur les pays figurant en bas de page dans les tableaux de la sous-section A4.

3.2 DEFINITIONS

3.2.1 Marchandise (produits des pêches)

A fins de normalisation et pour permettre des comparaisons internationales, les statistiques des importations et des exportations des poissons et produits des pêches se conforment à la Classification statistique internationale type des produits de la pêche (CSITPP). Les sept groupes de produits de la pêche figurant au paragraphe 3.1.1 ci-dessus ont été définis d'après la Classification-type pour le commerce international (revisée), la Nomenclature douanière de Bruxelles et la CSITPP. Voir la Section 6.

3.2.2 Définition du territoire douanier

Les statistiques publiées dans le présent Annuaire se rapportent, pour chaque année indiquée, au territoire douanier du pays considéré. Ce territoire correspond d'habitude à l'étendue géographique. Les exceptions sont indiquées dans les notes sur les pays figurant en bas de page dans les tableaux de la sous-section A4.

3.2.3 Définitions des pays d'origine et de destination

Les notes en bas de page indiquent si le commerce des produits des pêches avec un ou plusieurs pays donnés est exclu des statistiques d'importation et d'exportation fournies par le pays déclarant.

3.2.4 Définition des systèmes de classification du commerce international

Deux systèmes de classification du commerce international sont généralement adoptés, différant entre eux selon la méthods d'enregistrement des marchandises emmagasinées et réexportées: (a) le commerce spécial, et (b) le commerce général. Voir les notes sur les pays figurant en bas de page dans les tableaux de la sous-section A4.

4. UNITES DE MESURE ET TOTAUX

4.1 PERIODE DE REFERENCE

4.1.1 Dans les tableaux du présent Annuaire, les chiffres (à l'exception des données relatives aux baleines) se rapportent à l'année civile; les rares exceptions (généralement d'importance secondaire) sont indiquées en bas de page.

4.1.2 Dans les tableaux qui renferment également des données relatives à des années fractionnées, celles-ci figurent sous le millésime du début de la campagne si elles se terminent avant le 30 juin, et sous celui de la fin de la campagne si elles se terminent le 30 juin ou après.

4.1.3 Dans tous les tableaux, les chiffres relatifs à la production de produits de baleines se rapportent à la "campagne baleinière" (année fractionnée), qui englobe: (i) la campagne d'été de l'hémisphère sud, qui commence vers la fin de l'année civile et se termine au début de l'année suivante; (ii) la campagne d'été de l'hémisphère nord, qui a lieu pendant la dernière de ces deux années. Lorsque les chiffres relatifs à la "campagne baleinière" sont groupés avec des données se rapportant à l'année civile, ils sont indiqués sous le millésime de la fin de cette campagne.

4.1.4 Les mois de l'année civile sont, dans certains cas, désignés par des chiffres romains.

4.2 QUANTITES

4.2.1 Le système métrique est employé dans toute la mesure du possible. On trouvera en annexe (COEFFICIENTS DE CONVERSION) les principaux coefficients utilisés pour convertir les autres unités en unités de poids du système métrique. Lorsqu'il n'existe pas de facteur de conversion ou lorsqu'il semble que, pour des raisons techniques, il ne convient pas de donner les quantités en unités de poids, les renseignements sont exprimés dans l'unité utilisée dans les statistiques nationales.

4.2.2 Les renseignements exprimés en unités autres que celles spécifiées dans les en-têtes des tableaux, sont placés entre guillemets.

4.2.3 Les quantités sont exprimées en poids net ou poids brut, selon les méthodes statistiques des différents pays. La plupart des pays enregistrent les quantités en poids net et certains ont changé leur méthode d'enregistrement de poids brut en poids net pendant la période considérée dans le présent Annuaire.

La "pêche nominale" est exprimée en poids vif et les "quantités débarquées" en poids débarqué.

4.3 VALEURS

4.3.1 D'une manière générale, les valeurs sont exprimées en monnaie nationale, et arrondies le cas échéant.

4.3.2 Lorsque les valeurs ont été converties en dollars des Etats-Unis, l'opération s'est faite sur la base des facteurs de conversion annuels figurant en annexe (COEFFICIENTS DE CONVERSION).

4.3.3 Il convient de consulter les notes sur les pays figurant en bas de page dans les tableaux de la sous-section A4 pour établir si l'évaluation c.a.f. ou f.o.b. a été employée.

4.4 TOTAUX

4.4.1 Dans le calcul des totaux généraux, on a introduit des estimations de la FAO lorsque les chiffres officiels manquaient, ce qui est indiqué dans la colonne par le signe (...). On n'a pas tenu compte des pays et des articles qui ne figurent pas aux tableaux. Figurent entre crochets [ ] les totaux dont plus de 10 pour cent représentent des estimations faites par la FAO en l'absence de chiffres officiels.

4.4.2 Les quantités sont arrondies à la centaine de tonnes la plus proche (les milliers de tonnes sont arrondis à la première décimale). Les totaux pour les groupes et les sous-groupes de produits ainsi que les totaux continentaux sont arrondis au millier de tonnes le plus proche. Les totaux généraux pour l'ensemble du monde sont arrondis à la dizaine de milliers de tonnes la plus proche.

5. PAYS ET GROUPEMENT PAR CONTINENTS

5.1 NOMENCLATURE

5.1.1 Dans le choix des dénominations géographiques (qui, pour plus de commodité, figurent parfois sous forme abrégée), on a tenu compte et de l'usage suivi dans les publications des institutions internationales et des préférences officielles, telles qu'elles sont apparues à la FAO à la lumière de la situation de facto au moment de l'achèvement du manuscrit du présent volume (voir note au haut du verso de la page de titre).

5.1.2 Le terme "pays" employé dans les colonnes des tableaux doit s'entendre également de territoires, parties de pays ou de territoires ou regroupements tels qu'unions douanières, etc. Les désignations employées dans la présente publication et la présentation des matériaux qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies pour l'alimentation et l'agriculture aucune prise de position quant au statut juridique de tel ou tel pays ou territoire, ou de ses autorités, ni quant au tracé de ses frontières.

5.2 ORDRE

5.2.1 Quels que soient leur statut politique ou le degré de leur souveraineté, les pays et territoires sont classés dans l'ordre alphabétique anglais à l'intérieur de chacune des sept régions. Dans les tableaux des sous-sections B3, C3, D3, E3, F3, G3, H3, les pays de destination sont classés dans l'ordre alphabétique anglais, sans égard à leur appartenance aux divers continents. Les désignations des "pays de destination" sont celles qui figurent dans les publications nationales qu'on a utilisées.

5.2.2 Les continents figurent dans l'ordre alphabétique anglais:

1. Afrique
2. Amérique du Nord
3. Amérique du Sud
4. Asie
5. Europe
6. Océanie
7. U.R.S.S.

5.3 NOTES RELATIVES AUX PAYS

5.3.1 Il y a lieu de tenir compte de la différence entre les deux acceptions du terme territoire lorsque l'on compare les statistiques relatives à la production, à la préparation ou à la conservation des produits de la pêche aux statistiques du commerce international.

5.3.2 Au bas des tableaux (principalement dans la sous-section A4) figurent des notes par pays relatives au champ d'application des données nationales, au traitement statistique des données débarquées directement à l'étranger ou de l'étranger, au poids de base, et à d'autres questions d'intérêt général.

NOTAS

1. ESTADISTICAS SOBRE UTILIZACION DE LAS CAPTURAS NOMINALES

1.1 ALCANCE ESTADISTICO

1.1.1 Inclusiones

Las estadísticas abarcan la utilización de cantidades anuales de las capturas nominales o desembarques de toda clase de animales y plantas acuáticos (excepto ballenas), efectuados por los pescadores comerciales y de subsistencia que actúan en aguas dulces, salobres y marinas. Incluyen también la utilización de las cantidades producidas mediante la piscicultura y la cría de mariscos.

Las estadísticas de utilización de animales y plantas acuáticos incluyen las especies pertenecientes a las seis Divisiones siguientes de la Clasificación Estadística Internacional Uniforme para los Animales y Plantas Acuáticos (CEIUAPA):

1. Peces de agua dulce y diadromos
2. Peces marinos
3. Crustáceos, moluscos y otros invertebrados
...
5. Focas y diversos mamíferos acuáticos
6. Diversos animales acuáticos y residuos
7. Plantas acuáticas

Para más detalles, véase la CEIUAPA: Divisiones y Grupos, que se encuentra en la Sección 7.

Las estadísticas incluyen también la utilización de cantidades elaboradas a bordo de buques-factoría y otras embarcaciones pesqueras pertenecientes al país informante.

Téngase presente que en este Anuario el término "captura", salvo indicación en contrario, se refiere a la "captura nominal", es decir al peso en vivo equivalente de la pesca desembarcada.

1.1.2 Exclusiones

Los datos de utilización excluyen los siguientes:

(a) Las capturas y desembarques de ballenas de tipo grande y pequeño (especies pertenecientes a los grupos 4.1 y 4.2, es decir, a la División 4 de la Clasificación Estadística Internacional Uniforme para los Animales y Plantas Acuáticos).

(b) Las capturas realizadas por pescadores deportivos.

(c) La captura desechada, es decir, el pescado entero devuelto al mar en el momento de la captura.

(d) Las importaciones de animales y plantas acuáticos.

1.1.3 Tratamiento estadístico de los desembarques directos en el extranjero o del extranjero

Las estadísticas incluyen la utilización de capturas desembarcadas en puertos extranjeros por embarcaciones del país informante. Si no se sabe la forma en que estas capturas han sido utilizadas, se incluyen bajo el modo de utilización "Comercialización en fresco".

1.2 CLASIFICACION Y DEFINICIONES

1.2.1 A efectos de uniformación y comparabilidad internacional, las estadísticas sobre utilización de las capturas se basan en las siete categorías principales siguientes ("modos de utilización"):

Modo de utilización		Clase de artículo producido
(a)	Comercialización en fresco	Productos frescos: pescado vivo, fresco, refrigerado o en hielo, entero o limpio, en filetes, ruedas, etc.
(b)	Congelación	Productos congelados: pescado congelado, entero o limpio, ruedas, filetes, etc.
(c)	Curado	Productos curados: pescado seco, salado (en húmedo, en salmuera, etc.), ahumado, con especias, aderezado, marinado, curado con vinagre o azúcar, productos fermentados (salsas, jugos, pastas), etc.
(d)	Conserva	Productos enlatados: en recipientes cerrados herméticamente.

(continúa)

1.2.1 (fin)

Modo de utilización		Clase de artículo producido
(e)	Reducción	(I) Aceites: aceites de carne de pescado comestibles y no comestibles, aceites de hígado con contenido vitamínico, etc. (II) Harinas y abonos: incluídas varias clases de harinas y solubles (véase 1.2.2 más adelante).
(f)	Otros fines	Productos varios: productos frescos, congelados y elaborados (excepto harinas) destinados a la alimentación de animales, de aves y de pescado. Carnada, esencias de perlas, colas, etc.
(g)	Desperdicios para reducción	(Véase 1.2.2 seguidamente)

1.2.2 Sólo los peces enteros destinados a la manufactura de aceites y harinas se incluirán en la categoría de "Reducción"; la materia prima para la reducción, procedente de pescado destinado principalmente a ser vendido fresco, congelado, enlatado, curado y a otros fines, se clasifica como "desperdicios para reducción". En este caso, las cifras corresponden al peso neto (es decir, al peso real de los "desperdicios" disponibles para la reducción), y en cada cuadro se dan entre corchetes porque tales cantidades están también incluídas en el peso en vivo de los peces de que proceden.

1.2.3 Las capturas se clasifican por el modo de utilización de acuerdo con el último producto final obtenido; por ejemplo, las cantidades de pescado que en un primer momento se congelan con objeto de entregarlas como materia prima a las fábricas para que las conviertan en productos en conserva, hay que incluirlas bajo la categoría de conserva, mientras que el pescado vendido congelado al consumidor se indica bajo la categoría de congelación.

2. ESTADISTICAS SOBRE PRODUCCION DE PRODUCTOS PESQUEROS CONSERVADOS Y ELABORADOS

2.1 ALCANCE ESTADISTICO

2.1.1 Inclusiones

Las estadísticas abarcan las cantidades anuales de productos pesqueros conservados y elaborados obtenidas utilizando no solamente las capturas nominales de toda clase de animales y plantas acuáticos (excepto ballenas) efectuadas por los pescadores comerciales y de subsistencia que actúan en aguas dulces, salobres y marinas y de la producción de la piscicultura y cría de mariscos, sino también las procedentes de las materias primas importadas.

Las estadísticas deberán incluir, por consiguiente, la producción de artículos conservados y elaborados preparados con especies pertenecientes a las siete Divisiones siguientes de la Clasificación Estadística Internacional Uniforme para los Animales y Plantas Acuáticos (CEIUAPA):

1. Peces de agua dulce y diadromos
2. Peces marinos
3. Crustáceos, moluscos y otros invertebrados
4. Ballenas
5. Focas y diversos mamíferos acuáticos
6. Diversos animales acuáticos y residuos
7. Plantas acuáticas

Para más detalles, véase la CEIUAPA: Divisiones y Grupos, que se encuentra en la Sección 7.

Las cifras incluyen también las cantidades de productos conservados y elaborados obtenidas a bordo de buques-factoría y de otras embarcaciones pesqueras pertenecientes al país informante.

Asimismo incluyen las cantidades producidas por las familias de los pescadores como actividad doméstica, por ejemplo, el secado, la salazón y el ahumado de pescado, crustáceos, moluscos, etc.

2.1.2 Tratamiento estadístico de los desembarques directos en el extranjero o del extranjero

Las estadísticas sobre productos pesqueros conservados y elaborados incluyen también los producidos a bordo de buques-factoría nacionales y de embarcaciones pesqueras del país informante, aun cuando sean desembarcados directamente en puertos extranjeros. Sin embargo, en la producción nacional no se incluyen las entregas directas de productos pesqueros conservados y elaborados realizados por buques-factoría o embarcaciones pesqueras extranjeras que descarguen su producción en puertos del país.

2.2 CLASIFICACION Y DEFINICIONES

2.2.1 A efectos de uniformación y comparabilidad internacional, las estadísticas sobre producción de productos conservados se basan en la adjunta Clasificación Estadística Internacional Uniforme para los Productos Pesqueros (CEIUPP) que se encuentra en las secciones 6.1 y 6.2.

3. ESTADISTICAS DE IMPORTACIONES Y EXPORTACIONES DE PRODUCTOS PESQUEROS

3.1 ALCANCE ESTADISTICO

3.1.1 Inclusiones

Las estadísticas comprenden las cantidades y valores de las importaciones y exportaciones anuales de los productos incluídos en los siguientes grupos:

a/ CEIUPP: "Clasificación Estadística Internacional Uniforme para los Productos Pesqueros".
b/ CUCI: "Clasificación Uniforme para el Comercio Internacional, Modificada".
c/ NAB: "Nomenclatura Arancelaria de Bruselas".

3.1.2 Exclusiones

En las estadísticas de importación se excluyen el pescado y los productos pesqueros capturados por la flota pesquera del país y desembarcados en puertos nacionales.

3.1.3 Tratamiento estadístico de los desembarques directos de productos pesqueros en el extranjero o del extranjero

El procedimiento recomendado internacionalmente es:

(a) En las estadísticas de importación se incluyen el pescado y los productos pesqueros capturados por flotas pesqueras extranjeras y desembarcados en puertos del país.

(b) En las estadísticas de exportación se incluyen el pescado y los productos pesqueros capturados por la flota pesquera nacional y desembarcados en puertos extranjeros.

Las notas al pie de página indican hasta qué punto se siguen estas normas internacionales en los procedimientos estadísticos del país. Véanse también las notas sobre los países que figuran al pie de los cuadros de la subsección A4.

3.2 DEFINICIONES

3.2.1 Mercancías (productos pesqueros)

Para fines de uniformación y de comparación internacional, las estadísticas sobre importaciones y exportaciones de pescado y productos pesqueros se basan en la Clasificación Estadística Internacional Uniforme para los Productos Pesqueros (CEIUPP). Los siete grupos de productos pesqueros mencionados anteriormente en el párrafo 3.1.1 se han definido de acuerdo con la Clasificación Uniforme para el Comercio Internacional (modificada), la Nomenclatura Arancelaria de Bruselas y la CEIUPP. Véase la Sección 6.

3.2.2 Definición del territorio aduanero

Las estadísticas que figuran en esta publicación se refieren a las zonas aduaneras de cada país para los años que se indican; esto coincide generalmente con su zona geográfica. Las excepciones se indican en las notas sobre los países que figuran al pie de los cuadros de la subsección A4.

3.2.3 Definiciones de países de origen y destino

Las notas al pie de página indican si el comercio en productos pesqueros con cualquier país o países determinados está excluído de los datos estadísticos de importación y exportación facilitados por el país informante.

3.2.4 Definición de los sistemas de registro del comercio internacional

Se suelen emplear en la actualidad dos sistemas de registro del comercio internacional, los cuales se diferencian principalmente en la forma de registrar las mercaderías almacenadas y reexportadas: (a) comercio especial; (b) comercio general. Véanse las notas sobre los países que figuran al pie de los cuadros de la subsección A4.

4. UNIDADES DE MEDIDA Y TOTALES

4.1 PERIODO DE REFERENCIA

4.1.1 Salvo los relativos a las ballenas, los datos anuales de los cuadros de este Anuario se refieren al año civil; las pocas excepciones (generalmente de escasa entidad) se señalan mediante notas al pie.

4.1.2 Cuando los datos relativos a años emergentes se dan juntos con los de un año civil, los correspondientes a los años emergentes que terminan el 29 de junio o antes, van incluídos en el año civil en que empieza el año emergente, mientras que los datos relativos a los años emergentes que terminan el 30 de junio o más tarde figuran en el año en que termina aquél.

4.1.3 En todos los cuadros, los datos referentes a la producción de productos balleneros se dan para el "año ballenero" (año emergente) que cubre: (i) la temporada estiva de caza de la ballena en el Hemisferio Sur que empieza hacia el final de un año civil y termina después del comienzo del año siguiente; y (ii) la temporada estiva de caza de la ballena en el Hemisferio Norte en dicho segundo año. Cuando los datos relativos al "año ballenero" se presentan junto con los datos correspondientes al año civil, los primeros figuran en el año civil en que termina el "año ballenero" respectivo.

4.1.4 Los meses del año civil se indican en algunos casos con números romanos.

4.2 CANTIDADES

4.2.1 Se usa el sistema métrico hasta donde es posible. Los principales coeficientes usados para convertir otras unidades a unidades métricas equivalentes, están indicados en la Sección COEFICIENTES DE CONVERSION. Cuando no se ha dispuesto de coeficientes de conversión, o cuando se ha creído técnicamente inaconsejable expresar las cantidades en unidades de peso, los datos se indican en las unidades nacionales de medida que figuraban en los informes del país respectivo.

4.2.2 Los datos expresados en unidades diferentes de las indicadas en los encabezamientos de los cuadros, se indican entre comillas.

4.2.3 Las cantidades registradas en esta publicación figuran en términos de peso bruto o neto, de acuerdo con las estadísticas nacionales de cada país por separado. La mayoría de los países dan sus datos en pesos netos y algunos han cambiado su sistema del peso bruto al neto durante el período que abarca este Anuario.

La "captura nominal" se expresa en función del peso en vivo, y los "desembarques", en términos del peso desembarcado.

4.3 VALORES

4.3.1 Los valores se expresan generalmente en la respectiva moneda nacional, redondeándolos en caso necesario.

4.3.2 Cuando los valores han sido convertidos a dólares estadounidenses se han aplicado los factores anuales que figuran en la Sección COEFICIENTES DE CONVERSION.

4.3.3 Las prácticas nacionales para la evaluación del comercio exterior de los diversos países sobre f.o.b. o c.i.f. se indican en las notas sobre los países que figuran al pie de los cuadros de la subsección A4.

4.4 TOTALES

4.4.1 En el cómputo de los totales generales, los datos consignados han sido completados con estimaciones de la FAO cuando no se disponía de cifras oficiales; esta falta viene indicada en la columna correspondiente con el signo (...). No se ha tenido en cuenta ningún margen para los países y conceptos totalmente omitidos en los cuadros. Los totales entre corchetes [ ] son aquéllos en que más del 10 por ciento ha sido estimado por la FAO por carecer de cifras oficiales.

4.4.2 Las cantidades se expresan en la centena de toneladas más próxima (millares de toneladas métricas redondeados al primer decimal). Los totales de los grupos y subgrupos de productos y los totales continentales se redondean al millar de toneladas más próximo; los totales mundiales a la decena de millar más próxima.

5. PAISES Y SU DISPOSICION POR CONTINENTES

5.1 NOMENCLATURA

5.1.1 En la elección de los nombres de los países (que, en algunos casos, figuran en forma abreviada por comodidad) se ha tenido en cuenta la norma seguida en las publicaciones editadas corrientemente por los organismos internacionales, así como las preferencias oficiales, tal como las ha considerado la FAO, según la situación de facto en el momento de la preparación de este volumen (véase la nota en la parte superior de la contraportada).

5.1.2 En los encabezamientos de conceptos y columnas de los cuadros, el término "país" comprende también los territorios, partes de países, partes de territorios, o combinaciones de éstos, tales como uniones aduaneras, etc. Las denominaciones de países y territorios empleadas en esta publicación y la disposición de los datos que contiene, no suponen, por parte de la Secretaría de la Organización de las Naciones Unidas para la Agricultura y la Alimentación, aceptación ni juicio alguno sobre la condición jurídica di ninguno de los países y territorios citados o de sus autoridades, ni respecto a la delimitación de sus fronteras.

5.2 DISPOSICION

5.2.1 Independientemente de su régimen constitucional y grado de soberanía, los países y territorios figuran en orden alfabético inglés dentro de las siete divisiones continentales del mundo. En los cuadros de la subsecciones B3, C3, D3, E3, F3, G3, H3, los países de destino siguen el orden alfabético inglés sin atenerse a su situación continental respectiva. Las denominaciones de los "países de destino" son aquéllas que se han encontrado en las publicaciones nacionales empleadas en la preparación de este volumen.

5.2.2 Los continentes se numeran por orden alfabético inglés:

1. Africa
2. América del Norte
3. América del Sur
4. Asia
5. Europa
6. Oceanía
7. U.R.S.S.

5.3 NOTAS SOBRE LOS PAISES

5.3.1 Al comparar las estadísticas de pesca, elaboración y conservación del pescado con los datos del comercio exterior de un país, deben tenerse en cuenta las diferencias en los conceptos territoriales.

5.3.2 Las observaciones relativas al alcance estadístico de los datos nacionales, al tratamiento estadístico de los desembarques directos en el extranjero o del extranjero, al peso, y a otros aspectos de interés general, figuran como notas al pie de los cuadros, principalmente los de la subsección A4.

OTHER FAO DOCUMENTS IN THE FIELD OF FISHERY STATISTICS

Some of the documents in the following four series are concerned exclusively or partly with fishery statistical matters:

FAO Fisheries Reports

A series of reports of conferences, committees, commissions, working parties, surveys and other activities of the FAO Department of Fisheries.

FAO/UNDP Reports

A series of reports of surveys, seminars, training centers and other activities of the FAO Department of Fisheries under the United Nations Development Program.

FAO Fisheries Technical Papers

These documents, given restricted distribution, are prepared mostly as papers for conferences, committees, commissions, working parties, seminars, training centers, etc., or as summaries or compendia of information for use of Member Governments, organizations and specialists interested.

FAO Fisheries Circulars

These documents, given very restricted distribution, are mostly short notes, instructions for the completion of statistical forms and questionnaires, lists on various topics or provisional versions of documents which may eventually be issued in final form in one of the preceding series.

Some circulars, presenting statistical tables with provisional data, are prepared as papers for conferences, committees, commissions, working parties; these tables may eventually be issued after revision in the *Yearbook* or *Bulletin of Fishery Statistics*.

AUTRES DOCUMENTS DE LA FAO DANS LE DOMAINE DES STATISTIQUES DES PÊCHES

Certains des documents des quatre séries suivantes traitent exclusivement ou en partie de questions de statistique des pêches.

FAO, Rapports sur les pêches

Séries comprenant des rapports de conférences, commissions, comités, groupes de travail, des études et des rapports sur d'autres activités du Département des pêches de la FAO.

Rapports FAO/PNUD

Série comprenant des études générales ainsi que des rapports sur des séminaires, centres de perfectionnement et autres activités exercées par le Département des pêches de la FAO au titre du Programme des Nations Unies pour le développement.

FAO Fisheries Technical Papers

Documents faisant l'objet d'une diffusion restreinte et pour la plupart préparés pour des conférences, commissions, comités, groupes de travail, séminaires, centres de perfectionnement, etc., ou comme résumés ou recueils de renseignements à l'intention des gouvernements des pays membres, ainsi que des organisations et spécialistes intéressés.

FAO Fisheries Circulars

Documents faisant l'objet d'une distribution très restreinte. Il s'agit le plus souvent de notes succinctes, d'instructions pour remplir les formulaires et les questionnaires statistiques, de listes de sujets variés, ou de versions provisoires de documents susceptibles d'être publiés ultérieurement sous une forme définitive dans l'une des séries précédentes.

Certaines des circulaires présentant des données statistiques provisoires, sont préparées comme documents de travail pour des conférences, comités, commissions ou groupes de travail; ces données sont parfois publiées, après revision, dans l'*Annuaire* ou le *Bulletin statistique des pêches*.

OTROS DOCUMENTOS DE LA FAO RELATIVOS A ESTADISTICAS DE PESCA

Algunos de los documentos de las cuatro series siguientes se refieren exclusivamente, o en parte, a cuestiones de estadística de pesca:

Informes de Pesca de la FAO

Serie de informes de conferencias, comités, comisiones y grupos de trabajo, encuestas y otras actividades del Departamento de Pesca de la FAO.

Informes FAO/PNUD

Serie de informes de encuestas, seminarios, centros de capacitación y demás actividades desarrolladas por el Departamento de Pesca de la FAO dentro del Programa de las Naciones Unidas para el Desarrollo.

FAO Fisheries Technical Papers

Estos documentos, cuya distribución es limitada, se preparan mayormente como memorias para conferencias, comités, comisiones, grupos de trabajo, seminarios, centros de capacitación, etc., o como resúmenes o compendios informativos para uso de los Estados miembros, organizaciones y especialistas interesados.

FAO Fisheries Circulars

Con una distribución muy limitada, en su mayor parte se trata de notas sucintas, instrucciones para llenar formularios y cuestionarios estadísticos, relaciones sobre varias materias o versiones provisionales de documentos que un día se publicarán en forma definitiva dentro de una de las susodichas series.

Algunas circulares que presentan datos estadísticos provisionales, se preparan como documentos de trabajo para conferencias, comités, comisiones o grupos de trabajo; estos datos, una vez revisados, se suelen publicar en el *Anuario* o en el *Boletín estadístico de pesca*.
